

CWS RIFLE

CWS RIFLE

ACTION

Barnard Precision Model SM
3 lug bolt with 60 degree throw

CALIBRES / BARREL TWIST RATES

.308 Winchester (standard) / 1 : 10 or 1 : 8
.338 Federal / 1 : 9
.243 AI / 1 : 8
.223 Remington / 1 : 8
.300 Blackout / 1 : 8
6.5 x 47 Lapua / 1 : 8
6.5 Creedmore / 1 : 8

AVAILABLE BARREL LENGTHS

16" (standard), 18", 20", 24", 26"

WEIGHT

5085g (carbon wrapped 16" barrel)
5850g (heavy S/S fluted 16" barrel)

DIMENSIONS

Full length: 935mm x 190mm x 97mm
Stock folded: 675mm x 190mm x 97mm
(with 16" barrel)

MATERIALS / FINISHES

Chassis: 6061-T651 Al, hard anodised to MIL-A-8625
Receiver: 4340 HT steel, black plasma nitrided
Fittings: 6al-4v Titanium, Ti/Al PVD Nitride coated
Hinge wear points: 60 (Rockwell C) Tool steel

INCLUDED ACCESSORIES

Sling kit with quick release mountings
Picatinny rail sections - 2 polymer, 1 alloy heavy duty
Pelican IM3100 Storm Case with die cut foam insert

OPTIONS

GCPD tool steel high efficiency muzzle brake (as shown)
Oceania Defence over muzzle brake suppressor - titanium
Oceania Defence over muzzle brake suppressor - inconel
Hardy titanium suppressor (direct mount)

CWS - VERSATILE, COMPACT & ACCURATE

The CWS rifle system answers the needs of the modern tactical unit that requires operational flexibility, and discreet deployment. Exceptional accuracy has been proven beyond that required by the Australia-New Zealand (ANZ) Counter-Terrorism Committee Marksman Standard.

LIGHT WEIGHT

Lighter than most other manufacturers (the bare CWS 16" carbon barrel variant weighs just over 5 kilograms), due to innovative design and the use of advanced materials.

ADVANCED ERGONOMICS

Safety and magazine release controls are reached without undue operator movement by being accessible within the trigger guard. The CWS achieves the ultimate individual fit through full butt stock adjustment (without tools), ambidextrous operation of folding stock and fire controls, and multiple sling attachment points.

RUGGED DESIGN

A unique butt stock locking mechanism ensures a rock solid lockup that will endure for the platform's serviceable life. The Butt stock also locks into the folded position. All Materials and surface finishes have been selected to support the ultimate in service life.

* Carbon fibre wrapped barrel - higher strength to weight ratio than steel. Thermal properties contribute to a more stable and predictable cold / hot shot point of impact (POI)

* Beaver tail fore-end with synthetic grip panels and full length integrated UIT rail provide additional mission flexibility

* Hard anodised chassis finish - more durable than painted finishes
* Available in Olive Green or Black

* Ambidextrous bottom safety

* Dual control magazine catch- operable within, and external to trigger guard

* Multiple sling attachment points

* Infinitely variable ergonomic butt stock controls - no tools required

GC Precision Developments (GCPD) utilises in-house advanced design, modelling and manufacturing techniques to deliver world class products and client focused solutions for Defence, Law Enforcement, and the sporting shooting industry. GCPD is a proud Australian design and manufacturing company, and the CWS rifle system achieves a local ANZ manufacturing content of over 90%.
